[Correspondence of the Richmond Dispatch.] POLLING, BAVARIA, July 10, 1878. A desire to pen a few lines to the dear old anxious inquiries of Richmond friends and acquaintances, leads me to trouble you with this communication.

Polling, the little place of about twelve

nundred souls in which I am at present residing, is a most charming, interesting, and profitable spot for an art student. About priation: two hours from Munich, it is beautifully situated in the Ammer valley; to the south, over an undulating country, about ten miles distant, majestically rise the Bayarian Alps, some of the peaks carrying their white crests ten and eleven thousand feet above the level of the sea. In every direction is a beautiful bit of landscape-a perfect composition-only needed to be put on canvas to make a charming painting. over bits of rolling country, through batches and bunches of trees and bushes, we espy those old-fashioned church spires and tow-ers so often seen in pictures. Queer old country-wagons and hay-carts, hitched up with an ox and a horse, we see on every road leading from the villages. Everywhere over bits of rolling country, through batches road leading from the villages. Everywhere people are working in fields. There is a beautiful, poetical quietness in this unpretentious valley. We meet every one here with a simple "Gruesz Gott" (Greet you God). The people are very strongly devoted to their Church (Catholic), and some of their church ceremonies are very interesting and beautiful. As there are so many, and they so complicated, prefer giving you a detailed description at another time. The old cloister here is about 1,100 years old. There are only part of the buildings still standing, and improvements have been made at different times. Originally it was built for cloister women. In 973 the Huns nearly demolished the place. In 1010 it was very richly rebuilt. It has been partly destroyed and rebuilt at different periods. At present the church is very rich in decorative workmanship, and competes with many in

the surrounding country. There are nine American art students studying here at present, with a prospect of about ten more coming in fifteen or twenty days. Through the interest taken in artists by the present generous owner of the cloister, Mr. Schweighart, there are now five studios occupied by Americans, and the facilities offered here for the study of figure-landscape, cattle, and interiors is unexcelled anywhere in Bavaria, if in Germany. There is much more of great interest connected with this place and surroundings; and as time is of great value at present, I shall go more in detail and give you a longer article at another time. BUFFALO LITHIA WATER. THE BUFFALO LITHIA WATERS.

DR. HORATIO C. WOOD,

ATTESTS THE VALUE OF THESE WATERS RHEUMATIC GOUT.

[Editorial in Philadelphia Medical Times of July 20, 1878.] "BUFFALO LITHIA SPRINGS.

"The value of Alkalies in disease has long been known, and the wide reputation of the Springs of Cichy bear testimony to the superiority of the natural waters over the simple Alkalies. Of late years Lithia has been asserted to have especial value in Chronie Gout over and above that of other Alkalies. Some considerable experience has indicated that the assertion is well founded; and several years since we looked for a native Lithia Water which should be cheap and efficient. The product of the Buffalo Springs of Mecklenburg county, Va., was finally brought to our notice by a Baltimore physician who had been relieved by its use of some very troublesome and alarming symptoms, believed to be due to some and alarming symptoms, believed to be due to an inherited gouty diathesis. Tried in one or two cases of inveterate Chronic Gout, has afforded much satisfaction to us, free duresis being provoked, and followed by relief of symptoms." jy 27-eod41

AUTION .- The attention of persons OAUTION,—The attention of persons using water-closets on their premises is called to the danger to their health by allowing the water to flow continually through the closets, as for every gallon of water thus passed through the closet A SIMILAR AMOUNT OF SEWER AIR MAY BE RECEIVED INTO THEIR HOUSES, unless the closets are supulied with ventilating tubes. Of course a CEIVED INTO THEIR HOUSES, unless the closets are supplied with ventilating tubes. Of course a sufficient amount of water should be used to cleanse the pipes, and only an excess is to be avoided. I am directed by the Committees on Health and Water to call special attention to the unnecessary waste of water in this manner, and to give notice that visits will be made by officers repeatedly to see that this custom is discontinued.

Respectfully,

President Board of Health.

OFFICE CITY WATER WORKS, July 16, 1878. 
The increased demand upon these works, and the limited pumping capacity, makes it imperatively necessary that the strictest economy should be observed in the use of water. The pumps are now driven to their utmost capacity, day and night, never being stopped unless for repairs, which, from such constant labor. Is often necessary. The reservoirs during this hot weather are losing head daily, which is all important, particularly in the elevated parts of the city and in case of fire. In view of the above it is most urgently requested that the citizens will use every effort to prevent all unnecessary waste, and thus save the city from a possible water famine.
